

Granite worktops in five easy steps:

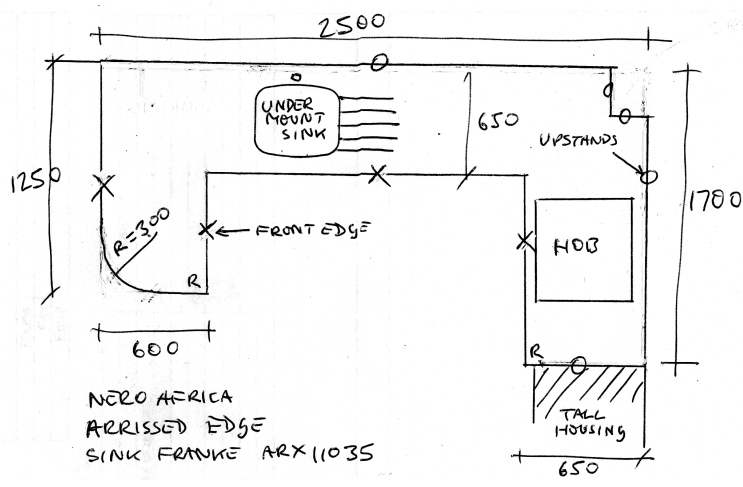

1. Fax, post or email us your sketch and details. You can use the form overleaf if you like. We will send you a quote based on that information.
2. You accept the quote by paying a deposit.
3. We order the material and arrange to template the job. Templating takes place at mutually agreed time within about two weeks after we receive your deposit. The templater usually carries granite samples for confirmation
4. We confirm the price and start fabricating
5. We install your tops around 20 working days later

In order to give an accurate quote we need:

- Granite type and edge detail and a dimensioned sketch showing clearly:
- All polished edges
- All corners to be radiused
- All upstands and the height of the upstand
- The sink type (undermount, inset, butler etc) and position
- Number of tap holes and number of drainer grooves
- Hob cut out and position
- Any other relevant information
- The site address and phone number
- Any access or parking issues

The quote will be adjusted once we have templated. If your information was accurate then the quote should be accurate.

Your sketch should look something like this

For more detailed information please see 'Guidance notes for Granite and Marble installation' on our web site www.caraco.co.uk
